Technical expertise and business partnership

We proudly serve as your lubricant partner in markets around the world. A respected distributor of respected global brands, we offer unique access and insights into specification changes and trends. As a local distributor, we bring hands-on training, quick response times, and face-to-face customer support.

Every lubricant program we develop is personalized. From brand selection, product type, testing, maintenance, and recommended scheduling we offer a **holistic five-step process**:

1. Operational Analysis

Our technical lubricant experts meet with you to review your operations, analyze your product needs, equipment status, operational strengths, and opportunities.

2. Benchmark Objectives

We determine the optimal products and evaluate ways to lower inventory carry costs, and look to reduce Total Cost of Ownership (labor, disposal, vehicle availability, and product cost).

3. Ongoing Communication

We stay in touch, even after your lubricants are delivered. We ensure your program is meeting your need and keep you informed of changes and trends in the industry so you are prepared to make informed decisions.

4. Oil Analysis

To remain operating at peak performance, it is essential to test and evaluate your lubricants over time. Our oil analysis teams review your lubricants to maximize productivity and the life of your lubricants.

5. Continuous Improvement

It starts with lubricants but we always look for opportunities to support your business. We serve customers of all types and recommend things to help you be more efficient, reduce costs, or improve your lubricant or fuel program.

With World Fuel Services as your partner, your business receives the support, tools, resources, training, and guidance you need every step of the way.

Learn how a custom lubricants program could make a real difference for your business.
