

Are you getting the most value for your Landfill Gas?

MAXIMIZE BIOGA\$ VALUE

Biogas/Renewable Natural Gas (RNG) is in high demand and there are opportunities to increase revenues by producing RNG and getting it to the right market. Instead of flaring biogas or burning it to produce steam or electricity, consider taking advantage of the Renewable Fuel Standard and using it to displace fossil fuels in the transportation market. The benefits to your facility can be substantial – if interested we can provide a case study describing the process, logistics and potential financial benefits.

KINECT EXPERTISE

- Maximize Bioga\$ Value
- Fleet Fuels & Lubricants
- Maximize WTE Generator Ca\$hflow
- PPA & VPPA Optimization
- Maximize RP\$/SOx/NOx Value

From fleet fuels to other value streams. . .

FLEET FUELS & LUBRICANTS

Optimize your fuel & lubricant spend – leverage market expertise to procure liquid fuel and lubricants more competitively. From fleet cards that save money at the pump to onsite fueling, we can tailor a solution that will prime your operation for success. We will work with you to deliver a custom fuel & lubricant management program best suited to solve your business needs.

MAXIMIZE WTE GENERATOR CA\$HFLOW

Waste management facilities can simplify electricity load and generation management activities while increasing cash flow by streamlining ISO market interactions, through the use of forward hedging tools and energy management software. The key is to know which items to watch for when monitoring a dynamic market and acting at the appropriate time in order to improve the bottom line and replicate a disciplined approach.

PPA AND VPPA OPTIMIZATION

Evaluation of options for expiring Power Purchase Agreement prior to expiration, including detailed evaluation of replacement alternatives to the current PPA deal as well as extending the current arrangement and other viable options.

Evaluation and recommendation of optimal VPPA solutions for specific client locations from our database of vetted renewable energy suppliers, including risk assessment and contract negotiation services.

MAXIMIZE RP\$/SO_x/NO_x VALUE

Increase revenues and profitability through the execution of strategic forward electricity contracts, Renewable Energy Credits (“RECs”), and other environmental attributes or credits. This process provides improved transparency and visibility of current market conditions and allows for an effective transaction at the most competitive pricing.
