

## SUPPLY MANAGEMENT

Expert logistics management delivered with a unique approach

One solution doesn't suit every business. Let us show you how to achieve cost savings, balance risk and ensure reliable energy supply with a custom supply management solution. Kinect Energy has been providing supply management for commodities such as natural gas, electricity, renewable products and other liquid fuels for thirty years.

*Continuity of physical supply  
24/7/365 is a must.*

We view interactions with our clients as part of a relationship rather than a one-time transaction. Kinect Energy maintains a 24/7/365 operations center, therefore, we are available to address client requirements when needed. Because we are engaged in logistical management spanning the globe, we ensure supply reliability. Regardless of the commodity, the supply management solution is tailored to your needs.

## COMPREHENSIVE SUPPLY MANAGEMENT

- Secure (physical) supply operations
- Physical supply hedge
- Load aggregation
- Market price access
- Balancing services
- Nomination services
- Logistics
- Transportation services
- 24/7/365 operations

## Full service logistics management

### SECURE PHYSICAL SUPPLY OPERATIONS

Kinect Energy has a wide range of physical and financial product offerings. Whether you need something as simple as fixed basis or market indexed to multi-leg options strategies embedded in physical supply, our experienced supply team can identify the most appropriate product to meet your needs.

### PHYSICAL SUPPLY HEDGE

Kinect Energy's Price Risk Managers retain a strong expertise regarding both physical and financial energy markets, and act as a resource for our clients. They develop and maintain a price risk management model to assist our Account Managers in developing and maintaining a client hedging plan and implementation. We monitor and analyze energy markets (using fundamental and technical models) as a basis for price fixing (hedging) of positions.

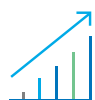

### LOAD AGGREGATION

Is your business in a position to aggregate energy purchases? Aggregation is the process in which energy is sold to our clients who have joined together as a group to purchase energy supply. By buying consolidated blocks of energy, aggregated groups may reduce their costs through increased buying power.

### BALANCING SERVICES

Balancing services are provided by Kinect Energy for every balancing period to make certain that energy coming into the system balances with the energy taken out of the system. Our value is to match our client's daily usage with their delivered supply. Our operations group is on call 24/7/365 guaranteeing that if an energy event arises, we have the staff to respond. We make recommendations to the client on scheduling activities and bank balances to minimize the cash-out costs.
